

INDEX

Chapter 1: Introduction to Programming Logic and Techniques (PLT)

- Program
- Algorithm 0
- Flowchart
- Symbols used in Flowchart 0
- **Drawing Simple Flowchart**

Chapter 2: Basic of PLT

- Variables 0
- Constants 0
- Data Types 0
- **Declaring Variables** 0
- **Variable Naming Conventions**
- Operators
- **Arithmetic Operators**
- **Relational Operators** 0
- Logical Operators
- Decision in a Flowchart 0
- **Multiple Decisions** 0
- Iteration 0
- **Dry Run Table** 0

Chapter 3: Introduction to C

- **Programming Language**
- History of C
- First Program in C
- Comments 0
- Compiler 0
- Run a Program

Chapter 4: Fundamentals of C

- Data Types
- Variables and Constants Numeric Variables 0
- 0
- **Character Variables**
- Signed and Unsigned Variables
- 0 **C** Identifiers
- **Reading and Writing Variables** 0
- Escape Sequence 0
- Operators 0
- **Assignment Operators** 0
- **Arithmetic Operators**
- **Arithmetic Assignment Operators**
- **Unary Operators**
- **Relational Operators**
- **Logical Operators**
- **Conditional Operator** 0
- Type Conversion

Chapter 5: Control Structures

- o Conditional Constructs
- if Constructs 0
- $\circ \quad \text{if ... else Constructs} \\$
- o if ... else if Constructs
- o nested if Constructs
- o Looping Constructs
- o while Loop Constructs
- o do ... while Loop Constructs
- for Loop Constructs 0
- break and continue Statements switch ... case Constructs 0
- 0
- o goto Statement

Chapter 6: Arrays

- **Declaration of Array**
- Initialization of Array
- 0 Multi-Dimension Array
- User Define Functions
- **Declaration of Functions**
- Passing a Value to a Function Floating Point Functions 0
- 0
- Recursion 0
- o Function using Array
- o Exit Terminate Program Execution
