SOFTWARE

At **"EDC info-net SOFTWARE SOLUTIONS PRIVATE LIMITED"**, our approach starts with understanding of your company's goals and objectives for the software. **"EDC info-net SOFTWARE SOLUTIONS PRIVATE LIMITED"** will then translate the results of the brainstorming workshop into a concept strategy for the client, drawing from in-house methodologies. We then develop the software from the bottom up, giving top priority to the intended audience/market and overall user experience

"EDC info-net SOFTWARE SOLUTIONS PRIVATE LIMITED" offers professional, affordable website design and development services. Whether you are looking to build your first website or make enhancements to your current site,

"EDC info-net SOFTWARE SOLUTIONS PRIVATE LIMITED" can help your business succeed online. We can design (or redesign) every aspect of your site. We can also host your site and perform social media optimization that will help you succeed online.

WEB

At **"EDC info-net SOFTWARE SOLUTIONS PRIVATE LIMITED"**, our approach starts with understanding of your company's goals and objectives for the website. **"EDC info-net SOFTWARE SOLUTIONS PRIVATE LIMITED"** will then translate the results of the brainstorming workshop into a concept strategy for the client, drawing from in-house methodologies. We then develop the website

from the bottom up, giving top priority to the intended audience/market and overall user experience.

This is followed by the design of suitable Information Architecture, followed by integration of your current marketing plan and logo design. This ensures your corporate identity is easily recognizable whether your client is surfing your website or reading your latest newsletter.

"EDC info-net SOFTWARE SOLUTIONS PRIVATE LIMITED" has expertise & experience in Web standards and best website design practices - we always endeavor for quick downloads, easy navigation and most of all consistency.

We have developed customized and unique web solutions starting from simple corporate websites to e-Commerce solutions, extensive web-based applications, etc across various industries. We identify your needs, and accordingly design and develop optimal solutions that address your business, marketing and communication objectives.

TRAININGS

"EDC info-net SOFTWARE SOLUTIONS PRIVATE LIMITED" is one of the leading name in providing Specialized Trainings to Engineering, M.Sc., MCA an under graduate candidates.

Our highly trained and experienced Technical team can serve to any kind of Corporate / Institute level Training needs, whether it is Technologies (like .Net, Java / J2EE, PHP, etc.), Databases (MS SQL Server 2005, Oracle, etc.), ERP packages, among others.

The Company grooms an individual in Industry endorsed technologies / products, to bridge the gap between the Employer requirements and the Candidate's skill-set. Employers prefer the skilled manpower to cut down the Training Cost.

Every trainee has to undergo Projects after the Training, giving them exposure on the implementation of the Technology, the Industry acceptable Project standards and architecture so that they can become cost effective asset to the Employer from the very first day.

Many students had been benefitted and are placed in Major Software Solution providers in India and abroad.

The Company in its mission to bridge the gap is tying up Institutes to impart Trainings to Engineering and MCA candidates at entry level that will, eventually, boost the placements of their students.
